

Air1 radio is the only positive alternative music station in my area. I am greatly encouraged by it's content and would be extremely upset if it went off the air. If Air1 would be displaced by other programming there would be no positive radio for young people in my area at all. I beleive the service provided by Air1 is in the public interest because of the positive values it teaches through it's talk shows and music. It is the only hip station I know of that doesn't play music about sex, drugs, gangs and violence.
